Summary

Over the past six years, I've played a pivotal role in enhancing values for organizations as an IT consultant, working closely with management and external stakeholders like customers. Together, we've identified critical areas of the organization and prioritized them based on their importance and potential impact on planned growth initiatives. My experience includes providing strategic guidance to optimize technological processes and drive revenue generation. As an IT Consultant, I leverage my expertise to identify and implement innovative IT solutions aligned with organizational goals. As an IT Support Specialist, I ensure seamless operations by resolving technical issues promptly and providing reliable support to end-users.
